Team Member Peer Assessment Form for Project Phases

PHASE NUMBER: 1

Strongly Disagree (1) | Disagree (2) | Undecided (3) | Agree (4) | Strongly Agree (5)

Place an x in the column indicating your response to each statement below.

Team Member #1   Name: _____Austin Baker_____

1	2	3	4	5	
				X	This team member was an asset to the team.
				X	This team member listened to and valued perspectives presented by other team members.
				X	This team member contributed ideas toward the solution of the project/activity.

Remarks concerning this team member:
Austin initiated the project change-requests assignment process by creating a new Trac ticket on the website before anyone else. Austin was a vocal participant in the group, offering a response (even if not the ultimate solution/approach used) so the group could identify a consensus-geared approach. Austin's peer review was accurate and useful and his review and code were received in time to enable a successful final implementation. Austin was also understanding on including a last-minute change to my CR implementation.

Team Member #2   Name: _____Debbie Rogina_____

1	2	3	4	5	
				X	This team member was an asset to the team.
				X	This team member listened to and valued perspectives presented by other team members.
				X	This team member contributed ideas toward the solution of the project/activity.

Remarks concerning this team member:
Debbie remarked at the beginning of the assignment that certain parts of the functionality behind jEdit were only possible using JRE6 and not JRE7, and this comment seemed helpful, despite the 'documentation' specifying the specs for building jEdit. Debbie helped coordinate tasks for the group, with other members, via email and reminded once about the TEAMEVAL deadline.

Team Member #3   Name: _____Dave Coons_____

1	2	3	4	5	
				X	This team member was an asset to the team.
				X	This team member listened to and valued perspectives presented by other team members.
				X	This team member contributed ideas toward the solution of the project/activity.

Remarks concerning this team member:
Dave was responsible, deadline-focused, and proactively helping to set the stage for the changes made by the group, in getting the SVN repo's initial commit pushed to the server. Dave did not offer too much on the advice end of directing others how to use SVN but listened and responded politely, while trying to help. Dave was the take-charge repo manager, so the rest of the group focused on more detailed aspects of the actual code, partly due to the help by him.

Team Member #4   Name: _____Jennifer Martin_____

1	2	3	4	5	
				X	This team member was an asset to the team.
				X	This team member listened to and valued perspectives presented by other team members.
				X	This team member contributed ideas toward the solution of the project/activity.

Remarks concerning this team member:
Jennifer (Jen) was among the most communicative on the team, as a programmer, and was receptive to input and ways to possibly improve the group's code. Jen also helped ensure that the functionality of her change request implementation was to the satisfaction of the group by requesting clarification as to how her feature (CR7-'add a search list-box) should be interpreted and seemed ready to proceed in accordance with any feedback she received.
