Assignment Information

Name

Adapter Pattern Implementation

Instructions

Think of a simple implementation of the adapter design pattern and implement it using java.

Optional: You may work with another student in the class. So a team of 2 students will submit one solution.

Submit a report (.docx or .pdf file format) with the following:

1. A breif description of the adapter design pattern specifiying its intent, structure, applicability, and consequences.

2. Describe your example.

3. The code for all the java classes you have created for your implementation.

NOTE: You cannot copy the code from any examples provided online (I will know if you do :)). You may use an exisiting example, but modify it to make it your own.

Due Date

Thursday, October 10, 2013 11:59:00 PM EDT
